

ISRA also listed in SDAX after TecDAX inclusion

ISRA VISION AG (ISIN: DE 0005488100) – the TecDAX company for industrial image processing (machine vision) and one of the world’s leading suppliers of surface inspection solutions for web materials and of 3D machine vision applications – is being included to the SDAX with effect as of September 24, 2018, according to the information of Deutsche Börse. The Company is simultaneously remaining in the TecDAX. ISRA achieves double-digit growth rates for many years in revenues and earnings, fulfills the management forecasts reliably and underlines its leading technology position also with pioneering innovations in the area of INDUSTRIE 4.0. The inclusion in the SDAX comes as a consequence of rule changes, whereby shares from the TecDAX can additionally be listed in the DAX, MDAX or SDAX. As a result of this new method, the previous separation between Tech and Classic has been lifted. The SDAX tracks the price development of the 70 largest companies in Germany below the MDAX according to market capitalization and stock exchange turnover. ISRA met the relevant criteria for inclusion in the SDAX in terms of market capitalization, free float and trading volume. By including technology stocks in the classic index, Deutsche Börse AG is showing confidence in future industries and high-tech companies like ISRA VISION AG.

Company profile

ISRA VISION AG, together with its subsidiaries, is worldwide leading in surface inspection of web materials. Furthermore, it is one of the globally leading providers of machine vision programs, specialising in the area of 3D machine vision, in particular for “3D robot vision”.

The core competence of the Company is the ISRA-BrainWARE®, an innovative software for intelligent machine vision systems. Here, the scientific know-how from the fields of optics, lighting technology, surveying technology, physics, image processing and classification algorithms and a complex system design are combined. Machine vision is a key technology for visualising systems that imitate the human eye. Today’s ISRA applications focus primarily on the automation of production and quality assurance of goods and products supplied to large, future-oriented markets such as energy, healthcare, food, mobility and information. The customers mainly include renowned global players from the respective sectors. With more than 25 locations worldwide, ISRA offers customer proximity everywhere and ensures optimum service and support.

In the past seventeen years, ISRA has shown profitable growth with an annual average increase in sales of approx. 25 percent. Currently the Company employs approx. 800 people worldwide.
